Usage Guideline Description

ING Format Description MT.940 Customer Statement Message ([link](#))

Structured MT940 (version 4)

The MT940 End of Day statement is a standard SWIFT (Society for Worldwide Interbank Financial Telecommunication) message for electronic banking statements. Many software packages are able to process information stated in this international standard format. It is often called the electronic banking statement. This document provides guidelines that enable companies to implement the MT940 statement into their systems and processes.

The structure of an MT940 message is based on SWIFT code words and code words from other relevant sources (/xxxx/) and subfields within a code word (/xxxx/subfield 1/subfield 2/). This format can be easily processed and reconciled by an automated function. The present layout is based on SWIFT Standards FIN, Category 9, Cash Management and Customer Status.

Usage rules for Structured MT940

- * Statements in case of no movement (zero statement) is default.
- * Statements in case of no movement (zero statement) can be switched off
- * Standard SWIFT headers will be used

ING Transaction Codification

The various transaction codification supported by ING in the End of Day statement can be found in Codification Annex to Structured MT940 & MT942 Strategic (See also appendix).

Message Separator

In case of multiple statements delivered in one file, the messages are separated by the sign "\$". This is applicable to the following Channels: InsideBusiness Connect, SwiftNet FileAct and EBICS.

Country coverage

This CAMT.053 applies to all ING countries incl. Multibank. For Multibank the CAMT.053 is based on an incoming SWIFT MT940. Therefore the CAMT.053 will contain limited information.

Outline

The ING Format Description MT.940 Customer Statement Message message is composed of 10 building blocks

a - 20 Transaction Reference Number

<div><p>This field specifies the reference assigned by the Sender to unambiguously identify the message.</p></div>

b - 25

c - 28C Statement Number/Sequence Number

<div><p>This field contains the sequential number of the statement, optionally followed by the sequence number of the message within that statement when more than one message is sent for one statement.</p></div>

d - 60F

e - Sequence

f - 62F

g - 64 Closing Available Balance (Available Funds)

<div><p>This field indicates the funds which are available to the account owner (if credit balance) or the balance which is subject to interest charges (if debit balance).</p></div>
